Customer Reviews

I love the flashcards as everything I need is right there before me to include a summary of facts and references to books and the pages used if I want more information. I am using the cards in conjunction with the teacher's manual for a 1st/2nd grade homeschool CO-OP history class and plan on having the kids make their own flashcards as a way to review the information during the week since we only meet one day a week.

Someone gave those us and I did not look at the stack of cards for over two years (I know...). Now that we started our history curriculum, I pulled them out because they go so well with it and the kids couldn't stop looking through the cards, hearing the 'stories' from the back, and actually retaining most of it. A wonderful learning tool.

Even though the online program shows all this info on the screen, my son still likes having his cards with him when he learns. It's an additional component that was worth the money for us.

It was what we were looking for. A few of the cards had water damage, but that was stated originally. We are already using them in school!

The product is great...now if I could just receive it! I'm still waiting for this company to send me what I've paid for. NOW I know not to order used items outside of !Out some money and without my items!P.
