# Science Play (Williamson Little Hands Series) (Williamson Little Hands Book (Paperback))

## Synopsis

Suitable for ages 2 to 6 years, this book helps kids to discover science all around them - biology in the backyard, chemistry in the kitchen and physics in the block pile. It includes 65 safe age-appropriate activities to encourage kids to discover, sort observe, predict, and think creatively.

## Book Information

Series: Williamson Little Hands Book (Paperback)

Paperback: 144 pages

Publisher: WilliamsonBook (September 15, 2006)

Language: English

ISBN-10: 0824967984

ISBN-13: 978-0824967987

Product Dimensions: 8.5 x 0.4 x 10.9 inches

Shipping Weight: 1.2 pounds (View shipping rates and policies)

Average Customer Review: 4.5 out of 5 starsÂ Â See all reviewsÂ (25 customer reviews)

Best Sellers Rank: #293,727 in Books (See Top 100 in Books) #186 inÂ Books > Children's Books > Science, Nature & How It Works > Experiments & Projects #79152 inÂ Books > Reference

Age Range: 3 - 6 years

Grade Level: Preschool - 1

## Customer Reviews

This book is extremely age appropriate for little kids and students will find many these projects/activities/experiments very enjoyable because they tap into what kids are already interested in. From blowing in straws to capturing bugs, I know my son is going to enjoy it. BUT, be very careful in your activity selections given your child's abilities/maturity. Not all children mature at the same rate... and some experiments are older kids and some for younger kids. Pay special attention to safety hazards, content, or if the chemicals are edible... and ask yourself: is my child at the right maturity for this experiment? Also, this book does not teach science in depth. For little kids ages 2-6 science is not necessarily about learning all the theories, it is all about experiencing what does and does not happen in nature and learning to figure out answers through trial and error. Kids will learn the complex theories for these observations later in school... right now is about teaching science basics like observe, record, experiment, question, etc. The book starts off with a GOOD reminder that all experiments are to be done with an adult as your lab partner, should wear old clothes, only use plastic containers, never taste anything unless the adult says ok, wash hands before touching

mouth or eyes, wash hands at the end of an experiment, when outdoors observe-do not disturb, take samples from nature only with permission and when not alive, no wondering off by yourself, and everyone cleans up the experiment together. In fact, these rules should be reminded to kids when appropriate to the experiment being completed. The book then gives some basic teaching instructions to grown ups.
