# E-RPG(V2): E-Volving RPG Applications For A Connected World

Synopsis

This companion to e-RPG: Building AS/400 Web Applications with RPG includes new techniques and functions to make e-RPG programming easier and more powerful than ever before. Not only does it provide the knowledge needed to create fully functional Web applications using OS/400 and RPG, but it also offers a thorough introductino to ILE. Operators learn about using embedded SQL for easier and more effective queries, using e-RPG as Perl for OS/400, debugging information for e-RPG and JavaScript, and creating dynamic Web page changes. Users are also introduced to XML and handheld device programming through Wireless Markup Language (WML) and Handheld Device Markup Language (HDML) examples.

Customer Reviews

I not only used this book as a tutorial to learn new skills, but also keep it around on my bookshelf as a reference manual for information I need to review.Every time I have needed more information about a specific application approach, Bradley has been there for me with a responsive email which detailed out how to accomplish my task.I have enjoyed the book and recommend it to anyone who might want to serve web pages using RPG.

This book is easy to read and provides some tools that will make your life much easier. The sample code is outstanding and is provided on a CD. If you like to learn by example, I highly recommend this book.Brad has even answered some of my questions online, you can't beat that!
