Forensic Investigations, Grades 6 - 8: Using Science To Solve Crimes

Synopsis

Connect students in grades 4–8 with science using Forensic Investigations: Using Science to Solve Crimes. In this 80-page book, students build deductive-reasoning skills as they become crime-solving stars. Most scenarios in the book have more than one plausible outcome, allowing individuals or groups to broadly interpret evidence. Activities include interpreting handwriting and body language and fingerprinting. The book supports National Science Education Standards.

Customer Reviews

a great additional resource for my classroom.

This is so fun and my students LOVED it. It was great for them to be creative and get to see practical applications of what they were learning.

This was perfect for our CSI class at school. The lessons worked great to prepare the students to process a crime scene we created.

very well-written for this age group

I love the activties
